

## Cortaflex Solution and Powder

### BEYOND CHONDROITIN AND GLUCOSAMINE

The No 1 joint nutraceutical – a unique formulation of the refined isolates of Chondroitin Sulphate and Glucosamine Sulphate, in a special blend designed to achieve exceptional assimilation and effectiveness in the promotion and maintenance of healthy joints. Also contains Sulphur to assist the passage through the cell walls.

#### The Clinical Proof

Cortaflex is the only\* equine joint supplement to have been scientifically proven in a double blind study to increase tarsal joint soundness.

The trial was undertaken at the College of Veterinary Medicine, Michigan State University, USA, led by world-renowned and highly respected orthopaedic clinician Dr. Hilary Clayton BVMS PhD MRCVS. The outstanding results of this study were presented at the A.A.E.P Veterinary Convention in Florida, December 2002, attended by a worldwide audience of veterinarians. This outcome confirmed an earlier double blind test in which 100% of the trial horses and ponies using Cortaflex showed a substantial improvement in stride length within days.

#### Key Ingredients:

- Glutamine
- Glycine
- Proline
- Glutamic Acid
- Glucuronic Acid
- Manganese Sulphate
- Sulphur
- Vitamin B 6
- Copper Sulphate
- Ascorbic Acid

#### For rapid absorption and benefit –

##### Cortaflex Solution – available in:

946ml - (Approx 1 months supply)

#### For maintaining joint mobility – The

##### original Cortaflex Powder – available in:

227gms - (Approx 1 months supply)  
454gms, 908gms and 3.6kgs

*“Having tried several well known joint supplements on a horse that was proving difficult to train, we had decided that we could help him no more. Mary Bromiley, the well known equine physiotherapist, suggested that we should try Cortaflex Solution. It worked amazingly, and the horse went on to win eleven of his twenty two races - mostly in Listed and Group Company. I have been using Cortaflex Solution routinely ever since”.*

Marcus Tregoning, Thoroughbred Trainer

NEW

## Cortaflex HA Powder and Paste

NEW

### High strength Cortaflex Powder and Paste fortified with Hyaluronic Acid.....for accelerated action.

Hyaluronic Acid is a major component of joint lubricating fluid which, until recently has only been available in expensive injectables. Cortaflex HA combines the scientifically proven benefits of Cortaflex with a highly effective oral form of Hyaluronic Acid.

Cortaflex will work for your horses joints but, if you feel extra help is needed, use Cortaflex HA Powder as a thirty day course to accelerate the Cortaflex programme, or use Cortaflex HA Paste as a pre-competition boost, always followed by Cortaflex Solution or Powder.

#### Key Ingredients:

- Sodium Hyaluronate
- Cortaflex ingredients as above

Available in 454 gms (A 1 month course, prior to the regular Cortaflex feeding programme) and 30ml paste (administer 10ml serving for 3 consecutive days)
